PROFESSIONAL SUMMARY

Full Stack Developer at PT Unicorn, building AI products that a Bali restaurant group runs on every day: an AI agent that answers guests and books tables across WhatsApp, Instagram, Email and TikTok (about 3,500 bookings and 17,700 messages a month), an HR platform used by 154 employees, and a multi-brand website builder. Works across the whole stack (Next.js, React Native, Node.js, PostgreSQL) and puts language models into production with guardrails, human handoff and measured results. Uses Claude Code daily to move faster, and verifies every change with tests and production data. Microsoft Certified in Azure AI Fundamentals.

KEY SKILLS

- **Front-End:** JavaScript (ES6+), TypeScript, HTML5, CSS3, React, Next.js, Tailwind CSS, Vite, responsive design
 - **Mobile:** React Native, Expo, over-the-air updates
 - **Back-End:** Node.js, Hono, Express, NestJS, REST APIs, Socket.IO, BullMQ, JWT, OAuth 2.0
 - **Data:** PostgreSQL, Drizzle ORM, Prisma, Redis, Supabase
 - **AI:** Mastra agents, OpenRouter, Gemini, OpenAI (Whisper), RAG, LiveKit voice agents, prompt design
 - **AI-Assisted Development:** Claude Code for daily engineering (planning, debugging, refactoring, code review), with every change checked by tests and measurement
 - **DevOps & Testing:** Docker, Coolify, Cloudflare, Vercel, GitHub Actions, Vitest, Playwright, Git
 - **Design:** UI/UX fundamentals, Figma, Adobe Photoshop, Adobe Illustrator
-

PROFESSIONAL EXPERIENCE

Full Stack Developer | Jun 2026 – Present

PT Unicorn · Ubud, Bali

Part of a small product team building the internal systems behind a group of restaurants and brands.

Channelflow: guest messaging and AI booking platform

Stack: Next.js, Hono, Mastra, BullMQ, PostgreSQL, Drizzle, Expo, LiveKit

- Co-developed one inbox for WhatsApp, Instagram, Email and TikTok, where an AI agent answers guests in their own language and books tables; in production it handles ~119 bookings and ~590 messages a day.
- The AI writes ~400 guest replies a day and hands chats to staff on allergies, complaints and low-confidence answers, with a second model checking before it continues.
- Contributed to the message pipeline's reliability: queued processing with retries, handoff to a human after a crash, voice-note transcription and photo understanding.
- Co-developed a staff Android app (Expo) for bookings with day, list and month views and analytics, and a voice booking agent now in pilot.

PeopleOS: HR platform

Stack: React, Express, PostgreSQL, Drizzle, React Native (Expo)

- Contributed to the HR platform used by 154 employees for hiring, training, scheduling, GPS clock-in and leave; focus on the mobile app, leave requests and approvals.

Unicorn CMS: multi-brand website builder

Stack: Next.js, Hono, PostgreSQL, Drizzle, Tiptap, Playwright

- Developing a drag-and-drop page builder for every brand site: 20+ elements, per-device layouts, version history, SEO and tracking, covered by end-to-end tests.

Website Developer & IT Support | 2022 – 2024

Aceh Besar Prosecutor's Office

- Maintained the WordPress public website and produced digital assets (banners, videos, infographics).
- Provided technical support and troubleshooting for staff.

Office Administrator & IT Support | 2021

DS&AI Syiah Kuala University

- Resolved staff and student IT issues within 24 hours and assisted with digital content.

Website Developer | 2019

AGC-Scopus 2019 – The 2nd Aceh Global Conference

- Designed and managed the conference website for 100+ attendees, with live updates during the event.
-

PROJECTS

Portfolio with AI Assistant

[rizky-portfolio.pages.dev](#) · Next.js, Gemini, Cloudflare, GitHub Actions

- An assistant that answers visitors' questions about my background in English or Indonesian; cut reply time from ~49 s to ~2 s by reading the résumé once when it changes instead of on every message.
- Raised mobile PageSpeed from 90 to 98 (LCP 1,536 ms → 508 ms) after finding the metric was waiting on a CSS fade-in.

Online Complaint Management System – BPSDM Aceh (SIKEMAS)

[sikemasbpsdm.web.id](#) · React, Node.js, Express, PostgreSQL, JWT, Google OAuth 2.0

- Production complaint platform with ticket tracking, multi-role access (User, Department Admin, Superadmin), audit logs and an analytics dashboard.

Online Attendance System – BPSDM Aceh

React, Node.js, Express, PostgreSQL, JWT

- Attendance with role-based access, one check-in per day per employee, and daily and monthly reports with server-side filtering.

ApplyMate AI

[apply-mate-ai-nine.vercel.app](#) · Next.js, TypeScript, Gemini

- Turns a résumé and a job posting into a match analysis and a tailored cover letter.
-
